

	Prohibited	<b>Examples of Locations of</b>	Our Cor	npany will
Material	Components	<b>Prohibited Components</b>	Reject	Accept
Aboveground Storage Tanks	<ul><li>Oil</li><li>Sludge</li><li>Oily Water</li><li>Insulation</li></ul>	<ul><li>Inside tanks</li><li>Outside tanks</li></ul>	Reject tank if it contains any of the prohibited components on this list.	Accept the tank only if it contains a large hole for interior inspection, <u>and</u> the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
AC Electric Motors (110 to 220V; 0.5 to 7.5 Horse Power)	Capacitors	On the motors	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the motor <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Air Conditioning Units (Portable)	<ul><li>Capacitors (up to 3 capacitors)</li><li>CFC/Freon</li></ul>	<ul> <li>Capacitor adjacent to motor and compressor</li> <li>CFC inside copper tubes and compressor</li> </ul>	Any load that contains capacitor, regardless what the label on the capacitor indicates. Documentation cannot be provided that prohibited components have been removed.	Only if the conditioning unit and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components (documentation required)
Batteries: Household Non- rechargeable Batteries	<ul><li>Alkaline batteries</li><li>Lithium-ion batteries</li></ul>	<ul><li>Alkaline batteries</li><li>Lithium-ion batteries</li></ul>	Reject.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Batteries: Rechargeable Batteries	<ul><li>Ni-Cad batteries</li><li>Lithium-ion batteries</li></ul>	Rechargeable batteries	Reject.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.

	Prohibited	Examples of Locations of Prohibited Components	Our Com	pany will
Material	Components		Reject	Accept
Batteries: Lead- acid Automobile Batteries	Lead-Acid batteries	Lead-acid batteries	Any load if lead-acid battery is commingled with other scrap.	Must be delivered separately from other scrap metal and only if the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Boilers	<ul> <li>Mercury switches in pressure gauge</li> <li>Mercury switches in thermostats</li> <li>Asbestos insulation</li> </ul>	<ul><li>Pressure gauges</li><li>Thermostats</li><li>On boiler</li></ul>	Any load that contains mercury switches.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Buses	<ul> <li>Ballasts (up to 20 ballasts)</li> <li>Fluorescent lamps</li> </ul>	On fluorescent lights	Any load that contains ballast/capacitor, regardless what the label on the ballast/capacitor indicates.	Only the bus <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Central Air Conditioning Units (Household)	<ul><li>Capacitors (up to 3 capacitors)</li><li>CFC/Freon</li></ul>	<ul> <li>Capacitors adjacent to motor and compressor</li> <li>CFC inside copper tubes and compressor</li> </ul>	Any load that contains capacitor, regardless what the label on the capacitor indicates. Documentation cannot be provided that prohibited components have been removed.	Only if the central air unit and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components. (documentation required)
Closed Containers: Drums, Tanks, Pails	Reject	Reject	Reject	Reject
Clothes Dryers (Household)	Capacitors (Repaired equipment may have added-on capacitors)	Adjacent to motor	Any load that contains ballast, capacitor, mercury, lead and other prohibited components.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.

Material	Components	<b>Prohibited Components</b>	Reject	Accept
Clothes Washers (Household)	<ul> <li>Capacitors (Repaired equipment may have added-on capacitors)</li> <li>Mercury switches</li> </ul>	<ul> <li>Adjacent to motor</li> <li>On the underside of the top</li> </ul>	Any load that contains ballast, capacitor, mercury, lead and other prohibited components.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Computers	<ul> <li>Electronic components</li> <li>Printed circuit boards</li> <li>Plastic casing</li> <li>Rechargeable batteries</li> </ul>	Whole computers	Reject	Reject
Computer Monitors	<ul><li> Screens with lead</li><li> Electronic components</li><li> Printed circuit boards</li><li> Plastic casing</li></ul>	Whole monitors	Reject	Reject
Computer Printers	<ul><li> Electronic components</li><li> Printed circuit boards</li><li> Plastic casing</li></ul>	Whole printers	Reject	Reject
Computer Keyboards	<ul><li> Electronic components</li><li> Printed circuit boards</li><li> Plastic casing</li></ul>	Whole keyboards	Reject	Reject
Copiers	<ul><li>Electronic components</li><li>Printed circuit boards</li><li>Plastic casing</li><li>Rechargeable batteries</li></ul>	Whole copiers	Reject	Reject
Dehumidifiers (Household)	<ul><li>Capacitors</li><li>Mercury switches</li></ul>	Adjacent to motor and compressor	Any load that contains ballast, capacitor, mercury, lead and other prohibited components.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.

	Prohibited Components	Examples of Locations of Prohibited Components	Our Con	pany will
Material			Reject	Accept
Dishwashers (Household)	Capacitors (Repaired equipment may have added-on capacitors)	Adjacent to motor	Any load that contains ballast, capacitor, mercury, lead and other prohibited components.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Drums	Any kind of solid and liquid waste, oil, etc	Inside drums	Any drums whose ends are not opened.	Only if the tops are opened and large holes punched on their bottoms, <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Dynamite	• Dynamite	• Loose	Reject	Reject
Electric Equipment with build-in Chargers (e.g., welders)	Capacitors	Inside electrical equipment	Any electrical equipment that contains capacitor, regardless what the label on the capacitor indicates.	Only if the equipment and the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Electrical Chargers	Capacitors	Inside electrical equipment	Any electrical equipment that contains capacitor, regardless what the label on the capacitor indicates.	Only if the equipment and the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Electric Motors (AC 110 to 220V; 0.5 to 7.5 Horse Power)	Capacitors	On the motors	Any motor that contains capacitor, regardless what the label on the capacitor indicates.	Only if the motor <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.

Material	Components	<b>Prohibited Components</b>	Reject	Accept
Electrical Transformers (oil and dielectric fluid based, tar-coated)	<ul> <li>Oil</li> <li>Dielectric fluids</li> <li>Plates</li> <li>Laminations</li> <li>Coils</li> <li>Tanks</li> <li>Carcass</li> <li>Tar</li> </ul>	Inside transformers     Dismantled transformer components	Any load that contains oilbased or dielectric-fluid based transform and/or transformer components.	Only if the load contains no oil-based or dielectric-fluid based transform and/or transformer components, and no other prohibited components.
Fluorescent Fixtures	Ballasts     Fluorescent lamps	On light fixtures	Any load that contains ballast, capacitor, mercury, lead and other prohibited components.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Fluorescent Lamps	Fluorescent lamps	On light fixtures or loose lamps	Any load that contains whole or broken fluorescent lamps.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Freezers - Open, Vertical Type (Commercial)	<ul><li>Ballasts</li><li>Capacitors</li><li>CFC/Freon</li><li>Fluorescent lamps</li></ul>	<ul> <li>Ballasts on fluorescent fixtures</li> <li>Capacitors adjacent to motors and compressors</li> <li>CFC in copper tubes and compressor</li> </ul>	Any load that contains a single ballast and/or capacitor, regardless what the label on the ballast and/or capacitor indicates. Documentation cannot be provided that prohibited components have been removed.	Only if the freezer and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components. (documentation required)
Freezers - Horizontal Type (Commercial)	<ul><li>Ballasts</li><li>Capacitors</li><li>CFC/Freon</li><li>Mercury switches</li></ul>	<ul> <li>Ballasts on fluorescent fixtures</li> <li>Capacitors adjacent to motors and compressors</li> <li>CFC in copper tubes and compressor</li> </ul>	Any load that contains ballast and/or capacitor, regardless what the label on the ballast and/or capacitor indicates.  Documentation cannot be provided that prohibited components have been removed.	Only if the freezer and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components. (documentation required)

Freezers (Household)	<ul><li>Capacitors</li><li>CFC/Freon</li><li>Mercury switches</li></ul>	<ul> <li>Capacitors adjacent to compressor</li> <li>CFC in copper tubes and compressor</li> </ul>	Any load that contains ballast and/or capacitor, regardless what the label on the ballast and/or capacitor indicates.  Documentation cannot be provided that prohibited components have been removed.	Only if the freezer and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components. (documentation required)
Furnaces (Household)	Capacitors	Adjacent to air blower motor	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the furnace and the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Home Entertainment Electrical Equipment	<ul> <li>Electronic components</li> <li>Printed circuit boards</li> <li>Plastic casing</li> <li>Rechargeable batteries</li> </ul>	<ul> <li>Televisions</li> <li>Radios &amp; receivers</li> <li>Stereos</li> <li>Cassette players</li> <li>VCR/VCD/DVD</li> <li>Alarm clocks</li> </ul>	Reject	Reject
Hydraulic Accumulator	Hydraulic accumulator	• high pressure tank/vessel in a hydraulic system	Reject	Reject
Level Detectors	Mercury	Inside level detectors	Reject	Reject
Medical Scrap	<ul><li>Sharps</li><li>Needles</li></ul>	<ul><li>Sharps</li><li>Needles</li></ul>	Reject	Reject
Mercury Vapour Lamps (Industrial)	<ul><li>Capacitor</li><li>Mercury inside lamps</li></ul>	<ul><li>Adjacent to the bulb/lamp</li><li>Inside lamps</li></ul>	Any load that contains mercury components and/or capacitor, regardless what the label on the capacitor indicates.	Only if the lamp <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.

	Prohibited	Examples of Locations of Prohibited Components	Our Con	npany will
Material	Components		Reject	Accept
Mercury Switches	Mercury	Mercury switches	Any load that contains mercury components and/or capacitor, regardless what the label on the capacitor indicates.	Only if the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Metal Halide Lamps (Industrial)	Capacitor	Adjacent to the bulb/lamp	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the lamp <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Microwave Ovens (Household)	Capacitor	Back of microwave oven	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the microwave <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Oil Filters	• Oil	<ul> <li>In individual filters</li> <li>Inside drums / containers holding filters</li> </ul>	Any load if any un-drained and/or uncrushed oil filter is present in the load.	Oil filters must be drained and crushed and the drums holding them must have large holes punched on the bottom, and the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Pressure Gauges	Mercury switches	Inside pressure gauges	Any load if it contains mercury switches.	Only if the load contains no ballast, capacitor, mercury, lead and other prohibited components.

	Prohibited	<b>Examples of Locations of</b>	Our Con	npany will
Material	Components	<b>Prohibited Components</b>	Reject	Accept
Pressurized Gas Tanks, Bottles, etc	<ul><li>Chlorine</li><li>Acetylene</li><li>Propane</li><li>Butane</li><li>Oxygen</li></ul>	Loose individual containers	Reject	Reject
Pipes	<ul> <li>Asbestos insulation</li> <li>Sludge</li> <li>Radioactive scale</li> </ul>	<ul> <li>Insulation outside of pipes</li> <li>Sludge, solid or scale inside pipes</li> </ul>	Any load if any pipe contains insulation, sludge, radioactive scale, etc.	Only if the load contains no asbestos insulation, sludge, radioactive scale, etc, and the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Photocopiers	<ul><li>Electronic components</li><li>Printed circuit boards</li><li>Plastic casing</li></ul>	Whole copiers	Reject	Reject
Radioactive Materials	<ul> <li>Radioactive material</li> <li>Smoke detectors</li> <li>Sensors containing radioactive materials</li> <li>Auto illuminating equipment</li> <li>Pipe scale</li> </ul>	<ul> <li>Smoke detectors</li> <li>Inside sensors</li> <li>Inside pipes</li> <li>On surface of auto illuminating equipment</li> </ul>	Any load that contains any radioactive materials.	Only if the load contains no radioactive materials <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Refrigerators (Household)	<ul> <li>Capacitors (Repaired equipment may have added-on capacitors)</li> <li>CFC/Freon</li> </ul>	<ul> <li>Capacitor for the fan in the cold storage compartment and compressor motor</li> <li>CFC in the copper line and compressor</li> </ul>	Any load that contains capacitor, regardless what the label on the capacitor indicates. Documentation cannot be provided that prohibited components have been removed.	Only if the refrigerator and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components. (documentation required)

	Prohibited Components	Examples of Locations of Prohibited Components	Our Con	npany will
Material			Reject	Accept
Sodium Vapour Lamps (Industrial)	Capacitor	Adjacent to the bulb/lamp	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the lamp <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Stoves (Household)	<ul><li>Ballast (for light)</li><li>Mercury in gas stoves</li></ul>	Adjacent to the lamp	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the stove <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Street Lamps (Industrial)	Capacitor	Adjacent to the bulb/lamp	Any load that contains capacitor, regardless what the label on the capacitor indicates.	Only if the lamp <u>and</u> the rest of the load contain no ballast, capacitor, mercury, lead and other prohibited components.
Sump Pumps	<ul> <li>Lubricant/Thermal fluid</li> <li>Mercury in level detectors</li> </ul>	Inside the pump housing	Any load that contains pre- 1980 and/or undeterminable sump pumps with lubricant/thermal fluid.	Only if the rest of the load contains no ballast, capacitor, mercury, lead and other prohibited components.
Tar	• Tar	<ul><li> Drums</li><li> Pails</li><li> Tanks</li></ul>	Reject	Reject
Televisions	Screens with lead	• Screens	Reject	Reject
Thermostats	Mercury switches	Inside thermostats	Any load that contains mercury switches.	Only if the load contains no ballast, capacitor, mercury, lead and other prohibited components.

	Prohibited	<b>Examples of Locations of</b>	Our Con	npany will

Documentation cannot be provided that prohibited components have been	Only if the vending machine and the rest of the load contain no ballast, capacitor, mercury, lead, CFC/Freon and other prohibited components. (documentation required)
			removed.	

Our Company PROHIBITS and will REFUSE and EJECT any offending loads/materials that are considered to be hazardous materials as stipulated in the municipal, county, provincial, state and federal laws and regulations. The Company will forbid unloading of any offending loads/materials at its premises, and the suppliers/transporters will have to immediately remove any rejected loads/materials from our premises at his/her expense.

In addition, we will promptly REJECT any scraps that contain <u>disproportionate</u> amounts of dirt/soil, rocks, woods, rubber, tires, general garbage, unattached plastic, paper and glass products, and other non-metallic materials, and the suppliers will have to promptly remove them at their expenses.

We will accept and purchase lead-acid batteries only when they are delivered separately from other scrap.
